Image Submission Process

Image File Submitted By User

File Processed (Thumbnail and various other aspects analyzed)

Is the image file unique?

Yes → File is uploaded to server and identifying information added to database → Provide user with unique link to their image

No → Display original image and possible match side by side. Does the user agree they are the same image?

No, the image is definitely unique

Yes, it is a match → Is the new image higher resolution than the match?

Yes → Delete old image, replace with higher resolution, and update old database links → Provide user with unique link to their image

No → Discard image and provide user with a unique ink to the higher resolution match
